DETAILED ACTION

1. This office action is in response to the amendment of November 6, 2008.
2. The examiner acknowledges the amendment to claim 4. The examiner notes that claims 1-3, 7, 9, and 10 have been canceled.

Allowable Subject Matter

3. Claim 4 is allowed.
4. The following is an examiner's statement of reasons for allowance: the prior art does not teach or suggest the limitations for a hermetic compressor including a shaft with an eccentric portion, an auxiliary shaft on the top surface of an eccentric portion, and a spindle portion on bottom of the eccentric portion, a main bearing supporting the spindle portion, an auxiliary bearing supporting the auxiliary shaft portion, a first balance weight provided on the auxiliary shaft portion, and a second balance weight provided on the spindle portion at bottom end of the eccentric portion of the shaft in combination with a separate member arranged between a first balance weight and an auxiliary shaft portion, the separate member having a head and a base portion and couples a first balance weight to an auxiliary shaft portion, wherein the base portion passes through a hole in the auxiliary shaft portion and the head portion is in contact with the auxiliary shaft portion, and the first balance weight and the auxiliary shaft portion are provided with a convex and concave part respectively wherein the convex part fits together with concave part.

The examiner notes that the specific novel feature of the instant invention is the separate member in combination with the concave and convex fitting parts of the first

Art Unit: 3746

balance weight and the auxiliary shaft portion. The instant invention claims a separate member which has a base portion disposed in a hole in the auxiliary shaft and a head portion contacting the top of surface of the auxiliary shaft. The instant invention claims that a weight and an auxiliary shaft have concave and convex fitting parts to position the weight with respect to the auxiliary shaft. The prior fails to teach a combination of these two features for an auxiliary shaft disposed on a top surface of an eccentric portion of a main shaft for a hermetic compressor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
